

## Trading Application

55 Branches, daily branch data consolidation at HO, daily corporate MIS / DSS, daily data-flow from HO to branches, all this at affordable cost, very short time for implementation.

### Profile

Was set up in June with the aim to clean up the Indian Made Foreign Liquor (IMFL) trade in the State, plagued by the tax evaded seconds sales.

### The Challenges

No broadband at many branches, even dial-up links are weak, low skilled operators & no tech skill at branches, 1000+ transactions from each branch daily (Huge volume of data)

### Application

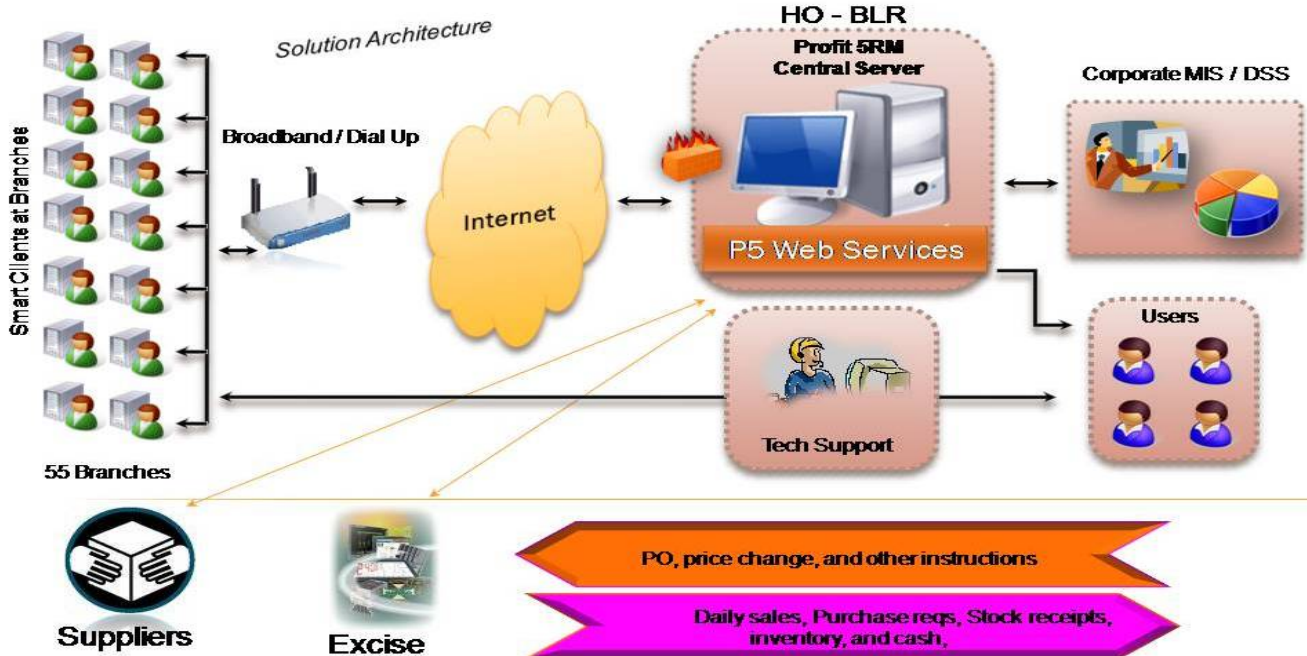

Profit 5RM<sup>®</sup>

Smart-client<sup>®</sup>

Oracle

### The Solution

Smart client deployment, robust “remote data-sync” with huge volume on a dial-up achieved, low skilled operators made comfortable with absolutely user friendly GUI, no maintenance at branches, only 1 member at HO for branch support, all these at an affordable cost

### Result

Using Profit 5RM<sup>(C)</sup>, the challenges faced by the company were overcome in a short span of time. Data was consolidated at the central server and was available when and where required in less time and less cost. There was high synchronization of data between all the locations and the system was robust that could smartly handle the changes. Moreover, consolidated book of accounts were prepared that resulted in more sophisticated application
